### **St. Clair County – COVID-19 Update #56 Health Department Launches New Online Data Dashboard and Social Media Changes**

The St. Clair County Health Department has launched a new online *St. Clair County COVID-19 Data Dashboard* now available on the website [www.stclaircounty.org/offices/health/COVID19.aspx](http://www.stclaircounty.org/offices/health/COVID19.aspx). Click on the link, "*St Clair County COVID-19 Dashboard*".

Effective May 12, 2020, the website link to the dashboard will be shared daily on our social media feeds, including the daily summary report and the county map of confirmed cases. Other previously shared graphs can now be found on the dashboard and will no longer be posted on social media.

The dashboard includes county data on age groups and gender; probable, active, confirmed, recovered and total case counts; total deaths and hospitalizations; available hospital beds; inpatient beds currently used by COVID-19 patients, and a definitions page.

"The new COVID-19 data dashboard will allow us to share important, current information on how COVID-19 is affecting St. Clair County residents," explained Dr. Annette Mercatante, Medical Health Officer of the St. Clair County Health Department. "We are hoping this centralized location for viewing the data will help residents find what they are looking for on a daily basis."

As we work towards slowing down community spread and reopening worksites, it remains critical residents continue taking precautions. Stay home as much as possible, except for essential trips such as work, food or medical needs. When in public, maintain social distancing of six feet or more, wear a face covering in enclosed public places, and continue frequent handwashing and other good hygiene practices.
