WHAT TO EXPECT AND WHAT TO DO

AFTER VACCINATIONS

www.scchealth.co | [f/scchdmi](https://www.facebook.com/scchdmi) | [t/@scchdmi](https://twitter.com/scchdmi)

WHAT TO EXPECT:

LOCAL REACTIONS: frequently occur within a few hours of vaccination.

May include:

- Soreness
- Redness
- Swelling

What can help

- Cold compress on site for no more than 10 minutes at a time
- Exercise the affected arm

GENERAL REACTIONS: common symptoms

- Fever
- Muscle aches
- Headache
- Loss of appetite

What can help

- Fluids
- Wear loose clothing
- Ibuprofen or acetaminophen

GENERAL REACTIONS: following live vaccines

After receiving the **MMR** vaccine, the following may develop in 1-2 weeks:

- Non contagious rash
- Fever
- Swollen glands
- Joint pain

After receiving the **Varicella** vaccine, the following may develop:

- Fever lasting 1-2 days
- Rash in 7-10 days

Call your healthcare provider or go to your local Emergency Center if you or your child develops:

- Hives
- Swelling of mouth or throat
- Wheezing
- Low blood pressure
- A fever for over 24 hours
- Cries or screams for 3+ hours after vaccination
- High pitched, unusual cry within 48 hours
- Is fussy and irritable for more than 48 hours
