Boil Water Advisory for Burtchville Township has been lifted

The Great Lakes Water Authority has announced that as a result of stabilized system pressures and the completion of water quality testing within the regional transmission and local distribution system the Boil Water Advisory for Burtchville Township has been lifted, effective immediately. A WINS notification has been sent to all affected residents.

Burtchville Township will still be manning the water distribution site at their fire station today only.

Two checklists are attached to this release containing steps for residents and businesses to follow prior to consuming water. They will also be available on the County's website at www.stclaircounty.org.
