

As of 11.1.2021

St. Clair County COVID-19 Data

This report displays the rate of new COVID-19 breakthrough cases and the rate of new COVID-19 cases among those unvaccinated per week. The rate of new cases among fully vaccinated individuals was significantly lower than of individuals that were not fully vaccinated. Our local St. Clair County COVID-19 data reflects statewide and national data that vaccination reduces the risk of COVID-19 infection.

#This report is provisional and subject to change. As public health investigations of individual cases continue, there will be corrections to the status and details of cases that result in changes to this report. Information based on illness onset date. If onset date is unavailable, the referral date to the health department was used. Case and breakthrough data was obtained through the Michigan Disease Surveillance System (MDSS). Vaccine coverage data was obtained from MDHHS and population data from the US Census.
