**INSTRUCTIONS FOR SUBMITTING A
 COMMERCIAL SEWAGE DISPOSAL PERMIT APPLICATION**

Permits are processed only when ALL required information is provided

Application MUST be submitted with the following:

1. Property address or road location with distance from nearest intersection.
IT IS IMPORTANT THAT THE SANITARIAN HAVE THE EXACT LOCATION OF THE PROPERTY
2. Complete and sign the application. APPLICATION SIGNATURES:
 - o Agent may sign only if written authorization from applicant accompanies application
3. Provide Legal description of the property, Also provide Tax I.D. NumberA survey may be required.
4. A detailed plot plan on a separate sheet of paper
5. All proper names are to be placed in designated lines. For definition of names, note the following:
 - o OWNER: Shall be property owner of record at the time application is filed
 - o APPLICANT Shall be one of the following:
 - o Same as owner if that person is the one developing the property.
 - o The purchaser of the property, if this is the person developing the property

After application is completed, email / return with all required information and proper fee

Payable to: SCCHD or call with credit card (fees apply)

- ◆ Under 1000 gallons per day: \$350.00
- ◆ Over 1000 gallons per day: \$400.00

ATTENTION: Installation of sewage systems between December 1st and March 1st, is PROHIBITED without prior approval from the St. Clair County Health Department. Installing a sewage disposal system when the ground is wet or frozen can shorten life expectancy of the system and result in failure sooner than if installation occurred during favorable conditions.

PROCEDURES AFTER SUBMITTING APPLICATION:

1. **CALL THE AREA SANITARIAN TO SCHEDULE AN APPOINTMENT BEFORE THE SOIL BORINGS ARE DUG.** Appointments may be arranged with your area sanitarian at (810) 987-5306, between 8 a.m. to 10:00 a.m., Monday - Friday
2. Due to heavy clay soil, most soil borings will need to be done by a backhoe. In some cases, with sanitarian approval, holes may be dug with a post hole digger or similar device; however, **POWER AUGERS ARE NOT ACCEPTABLE**
3. If soil borings are not done by a backhoe, then a minimum of two soil borings, 80 feet apart, shall be dug and are to be a minimum of four inches in diameter. Borings are to be at least four feet deep and placed on opposite ends of the proposed disposal field area. It is the responsibility of the applicant to assure there are no underground utilities in the vicinity of the borings
4. The soil is to be laid out in the sequence it is removed from the holes
5. Property lines shall be staked out along the road frontage

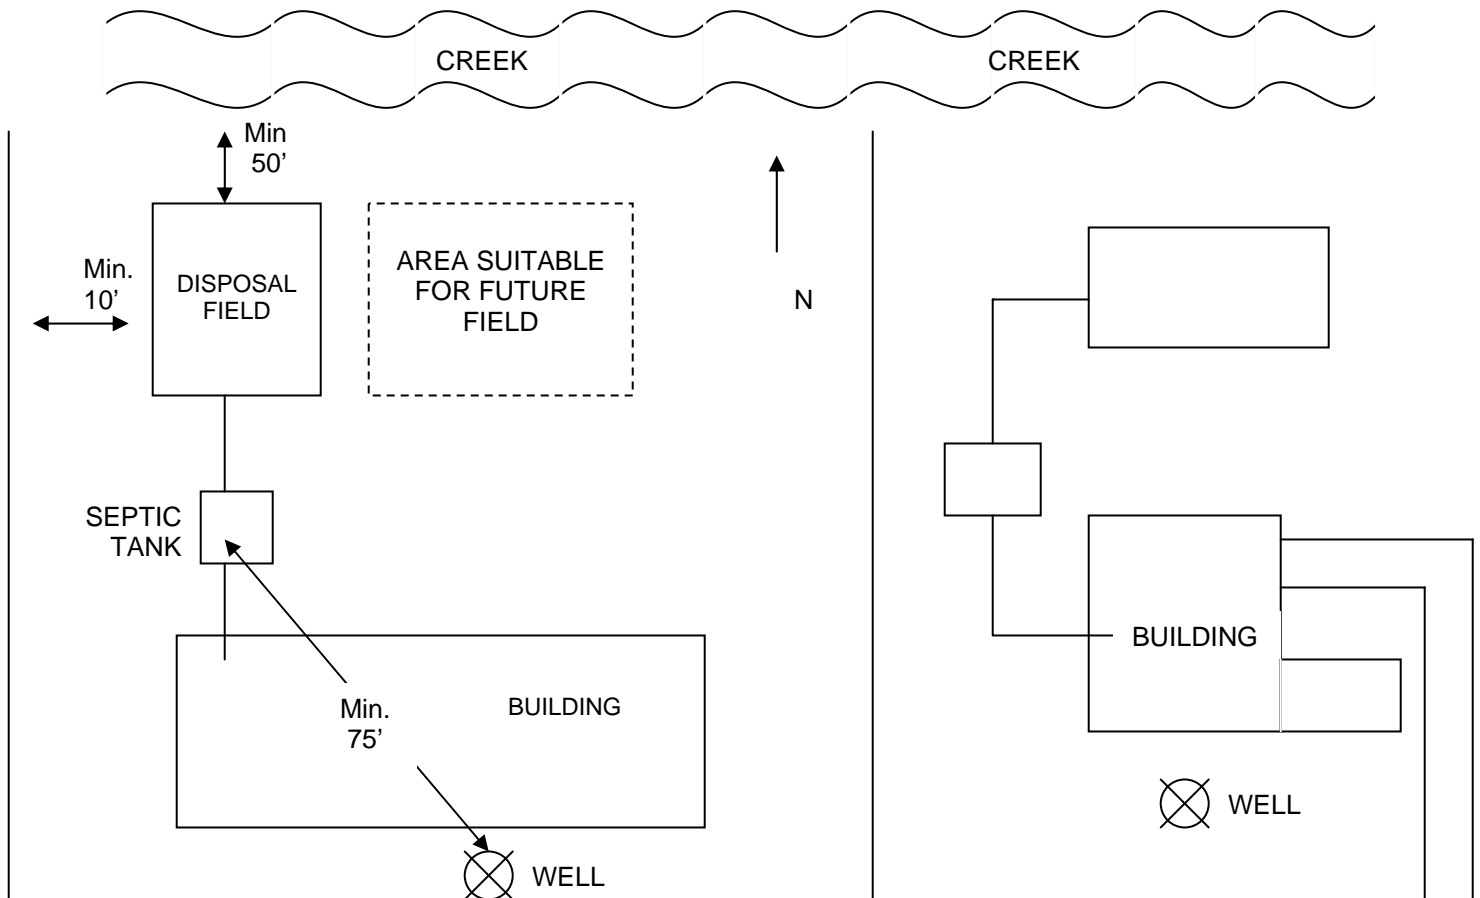

SAMPLE PLOT PLAN FOR COMMERCIAL SEWAGE DISPOSAL APPLICATION

- A. Show location of any existing construction such as buildings, wells, or sewage disposal facilities which are on the property, or adjoining lands.
- B. Show location of all proposed construction such as buildings, driveways, wells, and sewage disposal systems.
- C. Indicate any easements – lakes, ponds, drains, utility lines, etc.
- D. Indicate distances between wells and septic tanks, disposal fields, property lines, water courses, streams, rivers, lakes, drop-offs, etc., on property AND neighboring property.
- E. Your plot plan drawing should resemble the example shown below.

<u>MINIMUM REQUIREMENTS</u>		
ISOLATION FROM	SEPTIC TANK	DISPOSAL FIELD
Property Line or roadside ditch	10'	10'
Building Foundation	10'	10'
Type II or Type III Water Well	75'	75'
Residential Water Well	50'	50'
Lake, Stream	50'	50'
Bank or Drop-Off	10'	25'
Trees	5'	10'

St. Clair County Soil Erosion and Sedimentation Control Permit

A Soil Erosion and Sedimentation Control permit is necessary for an earth change which disturbs one or more acres of land, *OR* occurs within 500' of a lake or stream.

An “earth change” is described as being a man-made change in the natural cover or topography of land, including cut and fill activities, which may result in or contribute to soil erosion or sedimentation of the waters of the state.

A “stream” is a river, stream, or creek which may or may not be serving as a drain, and which has definite banks, a bed and visible evidence of a continued flow or continued recurrence of water, including the connecting waters of the Great Lakes.

Sediment is the product of uncontrolled erosion and is the greatest pollutant by volume entering our rivers and streams every year. Erosion and sedimentation result in the loss of fertile topsoil, increased flooding, destruction of aquatic habitats, filling of lakes and rivers, and structural damage to buildings and roads. Construction is one of the major causes of erosion.

The applicant must submit an application that provides specific information such as the name of the on-site responsible person, location and size of the earth change, description of the earth change and projected starting and ending dates. The soil erosion and sedimentation control plan shall be reviewed and approved by the St. Clair County Health Department.

Upon receipt of your permit fee, completed application, site plan and schedule of construction, an Environmental Health Sanitarian will conduct a site inspection. Your site will be inspected throughout the term of your permit to ensure compliance with Part 91.

At the end of the permit term a final inspection will be performed to determine if the site has been permanently stabilized or if the permit needs to be renewed.

To obtain an application for a soil erosion permit, contact:

**St. Clair County Health Department
Division of Environmental Health
3415 28th Street
Port Huron, MI 48060
(810) 987-5306**

Please note: Permit fees are subject to change.
