

Corrective Action Ongoing Updates:

01/4/24 Environmental/Public Works Committee Meeting:

- Odor Neutralization System: Installed 12/15/23
- Interceptor Trench: Completed trench on 12/22/23 and placed under vacuum. Air intrusion is at higher than optimal level – Talaski to place additional cover on area when conditions allow.
- Second Flare: Running consistently with one instance of unanticipated down time on 01/03/23 for approximately 10 hours. Exploring purchase of large until to provide greater vacuum flexibility.
- Odor Assessment: EGLE staff noted slight and intermittent to no odors off site. Landfill and EGLE staff provided feedback several residents indicate conditions significantly improved.
- Tetra Tech Air Monitoring: Tetra Tech noted a slight odor at Landfill entrance late afternoon 01/02/24 and nothing noticed since. No detection with portable meter 01/03/24 and monitoring will continue.
- Fixed Onsite Monitors: Installed 01/02/24. Comprehensive results to be provided after continued monitoring.
