

Date Issued: July 21, 2015

The Reportable Disease Update has been developed to communicate infectious disease surveillance information to community healthcare professionals. This update will be distributed quarterly to identify and communicate issues, trends in the community, and emerging communicable diseases that can impact our community.

Information Items:

- Summer in Michigan is the time of year to be aware of the potential for tick exposure and associated diseases. Michigan Department of Health and Human Services (MDHHS) has created a Lyme Disease Toolkit which has available resources for healthcare providers including up-to-date information, a webinar and free CME credit as well as printed resources and order forms for tick submission kits. Please visit the following website to access the toolkit.
http://www.michigan.gov/documents/emergingdiseases/provider_LD_toolkit_493634_7.pdf
- Now is the time to assess immunization status and encourage vaccines, as recommended by the ACIP, in order to avoid the “back-to-school” rush.
- New 2015 Sexually Transmitted Diseases Guidelines can be found at www.cdc.gov/std/tg2015 . A pdf version of the MMWR can be downloaded. Wall charts and pocket guides can be ordered as well as information on the 2015 STD Guidelines App that is available. A reminder that Michigan requires STDs such as Chlamydia, Gonorrhea, Syphilis and HIV to be reported to the local health department.

Please see the table on the next page for counts of reportable diseases as of June 2015.
