

**St. Clair County
Health Department**

**Reportable Disease Update
October 2016**

Date Issued: October 14, 2016

The Reportable Disease Update has been developed to communicate infectious disease surveillance information to community healthcare professionals. This update will be distributed quarterly to identify and communicate issues, trends in the community, and emerging communicable diseases that can impact our community.

Information Items:

- Vaccine Preventable Disease (VPD) Investigation Guidelines have been updated and can be accessed at http://www.michigan.gov/mdhhs/0,5885,7-339-73971_4911_4914-141609--,00.html . Take time to review the case definitions/classifications, laboratory specimen: procedures and considerations. Report all suspect and confirmed cases of VPD to St. Clair County Health Department (SCCHD).
- Hand, Foot and Mouth Disease has been prevalent in our community over the last month. SCCHD has been monitoring outbreaks in schools and daycares, providing support and resources to each facility.

Please see the table on the next page for counts of reportable diseases as of September 2016.
